

We all have a role to play in the mission to inspire positive change and protect our planet. You can find yours at Cardiff University.

We call the beautiful, student-friendly capital of Wales our home. It's a friendly, compact and safe city with a great character and impressive heritage.

Join us and you will be part of a thriving student community in a top five university for research excellence. Whatever you choose to study, you will have a stimulating and challenging experience with opportunities for personal development and career enhancement. We provide our students and graduates with opportunities to take on fresh challenges, work with a wide range of perspectives, and gain valuable new skills and experiences.

Our selection of environment focused science and engineering degrees touch on many of the biggest challenges for the world today.
