

The organisers of PEFTEC 2017 (Antwerp, 29-30th November) have published details of a comprehensive series of seminars that will follow the event's themes of testing, analysis and monitoring in the petrochemical sectors.

Running throughout both days of the event, a program of over 60 seminars will operate from 8 different seminar rooms within the Exhibition hall. The seminars will operate on a walk-in, walk-out basis, offering visitors the opportunity to select the subject matter of greatest interest. The seminars will address an enormous variety of subjects, covering techniques, methods, standards and cases studies in laboratory analysis, process monitoring and environmental monitoring. Abstracts for all of the seminars are available from www.peftec.com.

Located at the Antwerp Expo in Belgium, PEFTEC 2017 will be situated at the centre of one the world's largest clusters of petrochemical companies, and will include 4 Conferences focusing on analytical techniques, environmental monitoring, methane measurement and safety issues in hazardous situations.

In addition to the event's Conferences, Exhibition and Seminars, PEFTEC 2017 will also feature a Poster Display Area in which researchers from both academia and industry will publish the results of their latest work.

The cost of admission to the PEFTEC Conferences is €125/day, but entry to the Exhibition is free of charge for those that pre-register at www.peftec.com.
