

The domestic RHI will pay, on a quarterly basis, the following tariffs per unit of heat generated for seven years (28 payments).

{jathumbnail off}

RHI System Eligibility

Eligibility information is provided by Ofgem and can be viewed in more detail [here](#).

Biomass boilers & stoves

Space heating or space and hot water heating for a domestic property; log burning stoves not eligible.

Ground & air source heat pumps

As above; ground & air source heat pumps do not have to provide water heating to be eligible but may do so.

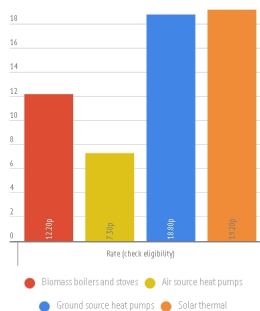

Solar thermal

Hot water heating for a domestic property; flat plate or evacuated tube only.

RHI Tariff Legacy Applications

Legacy applications are for those who installed an eligible appliance before the RHI scheme's roll-out date. Most legacy applications are closed, with the exception of some cooker stoves (31st July 2015). Check [Ofgem's eligibility list](#).

What the 1GW Milestone Can Do

In December 2014 Ofgem reported that the 1GW target of installed capacity had been met - but what can this heating capacity provide?

100,000

The number of homes which could have heat provided by 1GW.

100

The number of hospitals which could rely on 1GW capacity.

2

The number of gas-fired power stations the 1GW capacity is equivalent to.
