

JCT Analysentechnik GmbH (Austria) is a specialist company in the field of gas conditioning and emission monitoring. Their product range covers all parts needed for effective and efficient gas sampling including everything from heated gas sampling probes, heated hoses and gas conditioners – also for portable applications and where ATEX certification is needed.

With a global network of distributors and OEM partners JCT products and solutions are successfully deployed in leading power generation plants, the cement, mineral, iron & steel industry, the manufacturing industry, waste incinerators and also authorities, institutes and universities.

Today JCT is 20 years in business and well known for technically superior, reliable and durable gas conditioning components and efficient after-sales-service worldwide.
